

PepDog

Our story

- ▶ We are a team of seasoned professionals with extensive experience in this field. Having closely observed the value and vulnerabilities of meme tokens, we realized that a different approach was needed. We have witnessed meme tokens facing repetitive issues, which led us to make a decision. We were determined to create a real gem. As a team, we extensively discussed and carefully crafted a project with the most suitable features. Drawing inspiration from the success stories of two prominent meme tokens, we aim to follow their right moves and steer clear of their past mistakes. Our goal is to launch a true rocket by presenting a compelling narrative and avoiding the pitfalls that others have encountered.

About

- ▶ We drew inspiration from the two prominent meme tokens, Pepe and Doge. While there have been slow progress and winners already established in their realm, we have arrived with a fresh opportunity. Our aim is to reach a larger user base by utilizing multiple bridges and put an end to the rivalry between Pepe and Doge.

What are our goals?

- ▶ We are a team of forward-thinking individuals who are embarking on a multifaceted journey across various fields. Our mission is to create more than just a passive meme token that relies solely on trading activity. Instead, we aim to bring an attractive opportunity to other meme token users by introducing a value protection system. While other meme tokens may experience value depreciation, we strive to emerge as winners. By consistently introducing new events and activities, we will keep PepDog popular and engaging.

NFT

- ▶ We have decided to establish a platform to keep the project continuously active, generate buzz among investors, and elevate it to greater heights through new funding sources. Recognizing the significant presence of investors in the NFT space, we have made the decision to create a special series that will capture their attention. These NFTs will be limited to 6666 pieces, and one NFT will be given for free every hour to investors who have made purchases of \$75 or more. This strategy will not only attract and retain investors but also boost liquidity values.

Lucky Drop

- ▶ This system, which requires knowledge and experience, is also crucial for taking a project to new heights. By leveraging real-time data from BSC and ETH, the system will distribute 6 NFTs randomly among holders every hour. These NFTs will have special privileges and can be used in the NFT lending platform.

ROADMAP

Phase 1

- Launch
- CoinGecko/Coinmarketcap Listings
- ETH Bridge
- 2,000+ Holders
- Get \$PepDog Trending on twitter with our memetic power

Phase 2

- CEX Listings
- 5,000+ holders
- NFT lending
- Lucky Drop
- L2 Bridge

Phase 3

- DogPep Event
- Building a large community.
- T1 Exchange Listings
- 50,000+ holders
- Meme Takeover
